IN-PIPE CLARIFIER

THE CLARIFIER THAT STARTS INSIDE THE PIPE

INTRODUCTION

IN-PIPE CLARIFIER is a revolutionary wastewater technology that cleans sewage while it is still moving inside the pipeline, before it reaches the main clarifier. Using powerful catalytic reactions, it destroys organics, detergents, sulfides, oils, fats, odors, and toxic contaminants in real time. The result: cleaner water, reduced sludge, zero odor, and dramatically improved clarifier performance.

THE CLARIFIER THAT STARTS INSIDE THE PIPE

Just below your feet or below the surface, our streets are literally bubbling with activities. Pipes cross under, over or even through each other carrying our **drinking water, wastewater and stormwater drainage** from roads, our homes, businesses, along curblines, rooftop down spots and through sump pump connections.

Yet, these pipes and the essential services they provide are often forgotten or underappreciated. In entire world, average sewer collection system pipe is around **100 years old** and when pipes gets old, they corrode, break and collapse. All old pipes have capacity issues as population has increased dramatically.

Over the past 40 years **Watch Water®** and municipalities have made significant progress in protection of lakes, drinking water pipes and public health by developing new and innovative technologies. Due to capacity issue of existing pipes and the wastewater treatment plants, **Watch Water®** has developed a revolutionary **IN-PIPE CLARIFIER** to improve the existing treatment capacity by 70% without any investment.

ROADS

- Motor oil.
- Paved areas.
- Streets.
- Side walks.
- Parking lots.
- Vehicles (cars, trucks, tractors and etc.)

INDUSTRIAL MANUFACTURING

All kinds of toxic industrial wastewater, chemicals and Metals like copper, arsenic, chromium, mercury and etc.

RESIDENTIAL AREAS

- Wastewater from Kitchens, baths, toilets, washing machines, dishwashers, roofs & sinks.
- Pet waste.
- Heavy metals.

IN-PIPE CLARIFIER TECHNOLOGY FOR ADVANCED WASTEWATER PERFORMANCE

WATCH WATER DISCOVERS THE IDEAS ABOUT ENVIRONMENT

Cleaner water, reduced sludge,
zero odor, and dramatically
improved clarifier performance.

IN-PIPE CLARIFIER

Standard Packaging

Packaging	Weight of product	Quantity/ pallet	Gross Wt./ pallet
Drum	60 kg	18	1168 kg

★ Other packaging can be considered on request
